

DIRECTOR, QUALITY AND UTILIZATION MANAGEMENT AND ACCREDITATION

Providence Health Care (PHC), one of Canada's largest faith-based health care providers, invites you to join an organization that is guided by the principle '**How you want to be treated**'. An organization dedicated to creating a healthy community of inspiration and solace. Share in our passion to achieve excellence through learning and continuous improvement.

The Providence Health Care (PHC) Senior Leadership Team is committed to advancement of the organization's capacity for, and culture of quality, safety and innovation. Reporting to the Corporate Director, THINK PHC (Transforming Health/Innovative Solutions and New Knowledge) the Director, Quality and Utilization Improvement and Accreditation is a champion of high quality care and service at Providence Health Care. The position provides strategic leadership to the development, implementation, ongoing maintenance and evaluation of systems and strategies to support the improvement of quality and utilization management and accreditation through promoting and supporting innovation within Providence Health Care. These systems and strategies are based on the Mission, Vision and Values of Providence Health Care, Commitment to Excellence and the principles of continuous improvement.

The Director leads a multidisciplinary team of Quality, Change and Administrative Decision support professionals to ensure that collaborative processes are established to link the service, education, and research arms of the organization in achieving PHC's strategic direction to "foster a culture of innovation and improvement". Additionally, the Director provides quality improvement professional practice direction and expertise to the larger department and is accountable for PHC accreditation activities. The Director is responsible for working collaboratively with peers and teams at Providence Health Care and across the Vancouver Coastal Health Authority. As such it involves participation in local, regional and provincial committees and the management of confidential information.

The successful candidate will have a Masters degree in health administration or related studies, plus seven (7) to ten (10) years clinical and quality improvement experience including three (3) years experience utilizing the methodology and tools of continuous improvement to support clinical process and utilization improvement. Experience to include the application of Lean methodologies.
