

LEARNING OBJECTIVES

By attending the session, you will:

- Gain practical knowledge on making surgery safer by aligning different elements of surgical care such as the Checklist, VTE and SSI prevention.
- Expand your understanding of national and local requirements for surgical safety and learn practical approaches to achieve them.
- Use measurement to monitor and report improvement in surgical safety processes and outcomes.
- Learn strategies to improve teamwork, communication and the culture of patient safety.
- Synthesize advanced concepts regarding the importance, impact and effectiveness of the surgical safety checklist and use them to build implementation proposals or plans.
- Develop collaborative relationships with peers and experts (support network).
- Increase your understanding of the urgency and responsibility to change personal behavior.

MARCH 28, 2011 - Le Centre Sheraton, Montreal, QC

12:05 - 1:00 PM	Lunch, Surgical Safety Expo
1:00– 2:15 PM	Concurrent Session C Full descriptions of session see following page
2:15 - 2:30	Refreshment Break
2:30 - 3:45	Concurrent Session D Full descriptions of session see following page
3:50–4:20	Plenary: Are We There Yet? What’s Beyond Compliance?
4:20–4:30	Next Steps for Safe Surgery in Canada. Closing Remarks

Surgical Safety Expo – Your Contribution to the Learning

Share and exchange your checklist(s) adaptations, policies, evaluations, measurement tools, advertisements, pictures, posters or other relevant material. E-mail your items to Patricia Ballard (pballard@cpsp-icsp.ca), before March 20th or drop them at the workshop’s registration desk so we can include them in the Surgical Safety Expo. By doing so, you will be entered in a draw to win one of Dr. Bryce Taylor’s [new book](#): Effective Medical Leadership.

CONCURRENT SESSIONS

Each participant will be invited to select 2 topics for the morning and 2 for the afternoon. Sessions are designed to be highly interactive and will include a combination of short presentations, discussions, practical examples, case studies, tools developed by participants and/or role playing.

CONCURRENT SESSION A

- | | |
|--|--|
| Promoting Safe Surgery through the Qmentum Accreditation Program
(Broadcasted) | Learn about the expectations and content of the surgical related required organizational practices and acquire practical knowledge to help you improve surgical safety. |
| Surgical Site Infections: Examining New Evidence. | Experts and clinicians will discuss you how to build care excellence in preventing SSI: new evidence, resources and what you can do to apply them. |
| It Just Doesn't Fit Here: Much A Do About Nothing! The Checklist And Efficiency. | The checklist is first seen as a barrier to the effectiveness, efficiency, and OR workflow. What does checklist "implementation" or "use" actually mean? What is expected from me and my team? |

CONCURRENT SESSION B

- | | |
|--|--|
| Measuring the Impact of the Checklist: Using Your Data to Drive Improvement
(Broadcast). | Learn from clinicians, experts and peers what measures of success you can use, how to display and use your data to improve surgical safety, and discover what measurement strategies others are using. |
| Liability Trends in Surgical Safety. | Healthcare insurance experts will discuss types of surgical care liability trends and the benefits for the organizations who are investing in improving surgical care. |
| Venous Thromboembolism (VTE) Prophylaxis: Checked! | Experts, clinicians and accreditation surveyors will review the evidence, offer practical tips on ensuring your patients receive appropriate VTE, and show how to apply them in your own organization. |

CONCURRENT SESSION C

- | | |
|---|---|
| <p>Beyond the surgical checklist: what you need to know.
(Broadcasted)</p> | <p>Experts from medical and nursing protective organizations will share valuable lessons from Canadian liability cases, including the importance of communication as a necessary component of a safe surgical practice.</p> |
| <p>Green Eggs And Ham - Ways To Resist And How To Get Buy In.</p> | <p>Change management faculty will take you through steps in building the case for improvement, finding the right buy in solutions to engage the whole team, and spreading the word.</p> |
| <p>Medication Safety In Surgery</p> | <p>Medication safety experts and clinicians will discuss why medication safety in the OR matters, present available resources and offer tips to integrate them in your surgical services.</p> |

CONCURRENT SESSION D

- | | |
|---|--|
| <p>How Do We Make Good Things Happen More Often? Positive Deviance Can Change The Way We Work. (Broadcasted)</p> | <p>Understand the basic principles of Positive Deviance (PD) and learn from PD successes in transforming practice to prevent spread of superbugs as well as take home practical tips and tools that you can apply to improve patient safety.</p> |
| <p>Measuring the Impact of the Checklist: Using Your Data to Drive Improvement
(Repeated).</p> | <p>Learn from clinicians, experts and peers what measures of success you can use, how to display and use your data to improve surgical safety, and discover what measurement strategies others are using.</p> |
| <p>Promoting Safe Surgery through the Qmentum Accreditation Program
(Repeated)</p> | <p>Learn about the expectations and content of the surgical related required organizational practices and acquire practical knowledge to help you improve surgical safety.</p> |
